MGS PURCHASES MOLDING FACILITY IN JUAREZ, MEXICO

MGS Mfg. Group, headquartered in Germantown, Wisconsin, announced it has purchased an injection molding facility in Juarez, Mexico from Jabil, Inc.

The plant employs 500 people and runs 65 injection molding machines in a 125,000 square foot space. As part of the agreement, the Jabil employees will be able to continue as part of the MGS team.

MGS sees the Juarez location strategic for continued growth in the state of Chihuahua. MGS also operates 125,000 square feet of manufacturing in the city of Chihuahua, Mexico.

“We are pleased to welcome the Juarez employees to the MGS team. MGS has experienced significant growth in the Mexican market, and the Juarez facility is a great fit for our continued expansion,” stated Paul Manley, President of MGS.

MGS Mfg. Group is a leading global provider of optimized manufacturing solutions for high precision plastics products, with services including injection molding, mold making, value-added contract manufacturing operations, scalable automation & turnkey manufacturing systems.
